Better Savings & Improved Accessibility

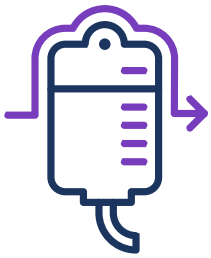
A Case Study

Renalogic
Guaranteed Impact. Every Day.

Challenge

High-dollar claims associated with Keytruda, an immunotherapy cancer treatment, spell trouble for Third-Party Administrators (TPA), other payors, and employees due to rising procurement costs and supply chain issues. Plus, buy and bill pharmaceutical models are unpredictable and often lead to payors and self-funded employer groups paying more than they have to.

Solution



impactInfusion

Renalogic's partner – GTRx Specialty Pharmacy Network (Golden Triangle) – **works with providers to help Keytruda patients obtain manageable savings. Doses of the drug are procured at a reduced rate through its white-glove approach to preferred sourcing**. Plus, they are shipped directly to the patient's local hospital, limiting supply chain concerns.

Results

This client saved **$30,100 (on average) every 3 weeks**. The client's health plan members received Keytruda through preferred sourcing and achieved greater savings and improved access to this high-cost infusion.

$520,000+ annual savings!
